

Summer 2018

Ping Identity

Position Title: Web Software Development Engineer Intern
Address: 1001 17th Street
City: Denver
State: CO
Zip: 80202
Paid Position: Yes
Deadline to Apply: February 16, 2017

Overview

At Ping Identity, we're changing the way people think about enterprise security technology. With our innovative Identity Defined Security platform, we're helping to build a borderless world where people have total freedom to work wherever and however they want. Without friction. Without fear.

We're headquartered in Denver, Colorado, and we have offices and employees around the globe. And we serve the largest, most demanding enterprises worldwide, including over half of the Fortune 100. Because even in the most complex enterprise environments, security shouldn't be a source of anxiety. It should be one of your greatest competitive advantages.

We call this digital freedom. And it's not just something we provide our customers. It's something that drives our company. People don't come here to join a culture that's build on digital freedom. They come to cultivate it.

Job Description

We are looking for a web software development intern to join our team in the summer of 2018 in Denver, Colorado. You'll be given the opportunity to have direct impact on the evolution of Pings technologies and help develop mission critical projects early in your career.

This summer intern position will provide you with the opportunity to gain experience in a dynamic, real-world software development environment. The successful internist will be detail-oriented, and have good analytical and problem-solving skills. You must be able to work effectively in a team environment, but also able to complete individual tasks with minimal day-to-day supervision.

Summer 2018

Job Functions:

- Using continuous integration tools for development (Jenkins)
- Developing & updating automated test scripts
- Helping to debug production issues and proposing solutions
- Developing new functionality for UI components
- Working closely with UI & graphic designers to develop new features
- Liaising with business stakeholders on functional requirements
- Having fun and learning from the rest of the team!

Special Job Requirements

Essential Qualifications:

- Exposure to Javascript frameworks & Java via previous work or studies
- Strong problem-analysis and solution-construction skills
- The ability to read, understand and improve existing code
- Excellent organization, communication and interpersonal skills

Desired Qualifications:

- Understanding of using Linux based OS (Ubuntu)
- Understanding on using JS & Java IDE's (Atom, Eclipse etc.)
- Desire to learn more about software development
- The attitude that anything is possible

Important:

Despite the deadlines posted here, applications are reviewed on rolling basis and hiring can occur once the right candidate is found, so apply as soon as you know you want to pursue this opportunity.

To Apply:

Please follow the 2-step process below.

- 1) Submit cover letter and resume via your school's career portal.
- 2) Apply on Ping Identity's website at
